This Action:	\$0.00	200.0
New Total:	\$0.00	200.0

Specific Elements**Description of Work:**

Cornell-Dubilier Electronics operated at the Site from 1936 to 1962 manufacturing electronic parts and components, including capacitors. During its operation, the company dumped material contaminated with PCBs and other hazardous substances directly onto site soils. On April 2, 1997, the Site was referred to EPA for the Removal Action consideration by the New Jersey Department of Environmental Protection (NJDEP). The Site was added to the National Priorities List in 1998. Since then, EPA has been addressing the Site using both short and long term cleanup actions. Interior cleaning of PCB contaminated dust from adjacent homes is part of Short-term cleanup actions. Indoor air dust samples collected from carpeted and non-carpeted floor of residential properties located near the Site were found to contain PCBs at concentrations up to

205 ppm. EPA suspects that PCB contaminated dust from the facility property migrated off-site via wind currents and was deposited into adjacent homes and on residential properties at levels of health concern and EPA has initiated clean-up activities.

EPA's cleanup activities involve the washing of interior heating and cooling ducts, shampooing of carpets, washing of linoleum and tile floor surfaces and all shelves and table tops. Cleaning solutions used during the mopping and wiping process are comprised of Lestoil or Mr. Clean and water.

EPA will mobilize to the site on Monday June 7, 2010 to cleanup seven private homes. Work will also begin on Monday June 7, 2010.

In accordance with the Response Section in the SOW, RST shall provide removal action support. The contractor shall perform the following activities:

- 1) Provide one RST member with Level C capability; prior to mobilization, contact the OSC to discuss site logistics and task assignments. Field work will be for approximately two weeks. Date of Mobilization is tentatively scheduled for **June 7, 2010**
- 2) Review site records/technical documents
- 3) Perform ERRS Contractor Oversight during interior decontamination of residential places;
- 4) Document on-site activities and maintain site log;
- 5) Perform video and Photodocumentation of pre- and post-cleaning operations at each residence and provide copies to OSC 5 days after completion of field event;
- 6) Provide chronology of events to be provided to OSC by the end of each work day;
- 7) Prepare and provide draft polreps.
- 8) Prepare and provide Draft/Final Remedial Action Report.

Equipment Requirements: Video Camera
